

BIODIVERSITY AND CONSERVATION

[Seep Pahuja Biology](#)

[seep.pahuja](#)

1. More conservative and scientifically sound estimate made by Robert May places the global species diversity at about

- (1) 1.5 million
- (2) 7 million
- (3) 1.7 million
- (4) 17 million

2. Select incorrect statement w.r.t. greater biological diversity in tropics

(A) Tropical latitudes have remained relatively undisturbed for millions of years and thus had a long evolutionary time for species diversification.

(B) Tropical environments are more seasonal and less predictable than temperates.

(C) There is more solar energy available which contributes to higher productivity.

- (1) (A) & (B)
- (2) Only (B)
- (3) (B) & (C)
- (4) Only (A)

3. Match the following—

- | | |
|--------------------|-----------------------------------|
| (a) Ants | (i) 20,000 species |
| (b) Beetles | (ii) >28,000 species |
| (c) Fishes | (iii) >3,00,000 species |
| (d) Orchids | (iv) >20,000 species |

(1) a (iv), b (ii), c (iii), d (i)

(2) a (ii), b (iii), c (iv), d (i)

(3) a (iv), b (iii), c (ii), d (i)

(4) a (iii), b (ii), c (i), d (iv)

4. Find out incorrect statement –

(1) Biodiversity exists at all levels of biological organisation

(2) A single species cannot show more diversity at genetic level

(3) Western ghats have a greater amphibian species diversity

(4) India has greater ecological diversity than Scandinavian country

5. Find the false statement.

(1) The number of fungi species is more than the combined total of the species of fishes, amphibians, reptiles and mammals.

(2) Conventional taxonomic methods are not suitable for identifying microbial species

(3) For many taxonomic groups, species inventories are more complete in temperate than in tropical countries.

(4) Insects forms 70 per cent part of all the species recorded

6. The term 'Biodiversity' was popularized by

(1) Robert May

(2) A. Von Humboldt

(3) Edward Wilson

(4) Paul Ehrlich

7. Loss of biodiversity in a region may lead to all of the following, except

- (1) Decline in plant production
- (2) Lowered resistance to environment perturbations
- (3) Increased variability in certain ecosystem processes
- (4) Increased endemism

8. Which of the following is the most important cause driving animals and plants to extinction?

- (1) Alien species invasions
- (2) Co-extinctions
- (3) Habitat loss and fragmentation
- (4) Over-exploitation

9. Find out the right one –

- (1) India has 7.1% species diversity
- (2) India is one of the 22 mega diversity countries of world
- (3) According to Robert May's global estimate only 22% of the total species have been recorded so far
- (4) According to Robert May's estimation, more than 3,00,000 plant species yet to be discovered in India

10. Which statement is incorrect –

- (1) There is increase in biodiversity from pole to equator
- (2) There is increase in biodiversity from low altitude to high altitude
- (3) There is directly proportional relationship between area & biodiversity
- (4) Tropics has less seasonal, relatively more constant and predictable environment.

11. The following are examples of In situ Conservation except?

- (1) Biosphere reserve
- (2) National Park
- (3) Sacred groves
- (4) Gene-bank

12. The following are examples of ex situ conservation except

- (1) Zoological parks
- (2) Botanical garden
- (3) Wildlife safari parks
- (4) Biosphere reserve

13. Co-extinction means

- (1) Introduction of alien species leading to decline or extinction of indigenous species.
- (2) Extinction due to over exploitation
- (3) Extinction due to Habitat loss.
- (4) Extinction due to obligatory association of plant or animal.

14. “When we conserve and protect the whole ecosystem, its biodiversity at all levels is protected.” This approach includes all of the following, except

- (1) Biosphere reserves
- (2) Seed bank
- (3) National parks
- (4) Sanctuaries

15. Mark the correct match

- (1) Wildlife sanctuaries in India – 90
- (2) Sacred groves – On-site conservation
- (3) Western Ghat – Rajasthan and M.P.
- (4) National park in India – 448

16. Select incorrect match

- (1) Aravalli hills – Gujarat
- (2) Khasi and Jaintia hills – Meghalaya
- (3) Sarguja – Madhya Pradesh
- (4) Western ghats – Karnataka, Maharashtra

17. In equation $\log S = \log C + Z \log A$, what is Z –

- (1) Species richness
- (2) Area
- (3) Regression coefficient
- (4) Y-intercept

18. In general, the loss of biodiversity in a region may not lead to –

- (1) Decline in plant production
- (2) Lowered resistance to environmental perturbations
- (3) Constant pest and disease cycles
- (4) Increased variability in certain ecosystem processes such as plant productivity

19. The recent illegal introduction of which African fish becomes severe cause of threatening of indigenous cat fishes –

- (1) Gambusia
- (2) Labeo
- (3) Clarias gariepinus
- (4) Dog fish

20. Which among the following is the criterion for determination of 'Biodiversity hot spot' –

- (1) Very high level of species richness
- (2) High degree of habitat loss and fragmentation
- (3) High degree of Endemism
- (4) All of the above

ANSWER KEY

1. (2) 2. (2) 3. (3) 4. (2) 5. (4) 6. (3) 7. (4) 8. (3) 9. (3) 10. (2)
11. (4) 12. (4) 13. (4) 14. (2) 15. (2) 16. (1) 17. (3) 18. (3) 19. (3) 20. (4)
